Education

University of Illinois Urbana-Champaign May 2025 – May 2026
Master of Computer Science | GPA: 4.0

University of California, San Diego Sep 2021 – Dec 2023
B.S. in Computer Science | GPA: 3.6

Work Experience

Center Director & Coding Instructor Feb 2025 – Present
Code Ninjas Union City *Union City, CA*

- Directed daily operations, program promotions, and digital marketing for an education center serving **500+ clients**, growing 2026 summer camp revenue by **over 20%**.
- Led and managed a team of **20+ instructors** to deliver coding and robotics programs across **Python**, **JavaScript**, **Web Development**, and competitive **FIRST Robotics**.

Software Developer Intern Apr 2023 – Dec 2023
Where2Be *San Diego, CA*

- Launched a **React Native** mobile app tailored for college events, scaling the platform to acquire **2,000+ users**.
- Built a **Python** backend with **Neo4j**, and **Docker** to streamline event workflows and local development.
- Developed a dynamic marketing website with **Next.js** and **Tailwind CSS** to improve visibility.

Co-Founder & Chief Technology Officer Sep 2022 – Apr 2023
Prolympia *San Diego, CA*

- Led full-stack development of a **React Native** mobile app, translating product requirements into scalable technical architecture and seamless user-facing features.
- Built a highly available **FastAPI** backend in **Python**, integrating **Firebase** and **PostgreSQL** to manage secure authentication, resilient data storage, and complex application workflows.
- Facilitated **Agile development cycles** through sprint planning and daily standups, streamlining team execution to hit key launch targets on schedule.

Software Developer Intern Jun 2022 – Dec 2022
Prometheus Platform *San Diego, CA*

- Collaborated within a **7-developer team** to build a web-based networking platform using **React** and **TypeScript**, delivering optimized frontend performance for financial stakeholders.
- Developed and maintained **50+ REST APIs** in **Golang** and designed optimized **PostgreSQL** database schemas to support core platform functionality.

Projects

TimeToVolunteer | *Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL*

- Engineered a full-stack volunteer management platform featuring role-based dashboards, secure **Supabase** authentication, and **PostgreSQL row-level security** to facilitate end-to-end workflows for application review, opportunity management, and volunteer coordination.

EBCL Medical Time Series Model Contribution | *PyTorch, PyHealth, Python, MIMIC-IV*

- Implemented an event-based contrastive learning model in **PyHealth** using **PyTorch**, **Transformer encoding**, and attention pooling, building end-to-end evaluation workflows for **MIMIC-IV** prediction tasks and conducting rigorous synthetic validation and ablation experiments that culminated in an **approved pull request**.

Technical Skills

Languages: JavaScript, TypeScript, Python, Golang, HTML, CSS, SQL

Frameworks & Libraries: React, Next.js, React Native, Node.js, FastAPI, PyTorch, Tailwind CSS

Databases & Backend: PostgreSQL, MongoDB, MySQL, Firebase, Supabase, Neo4j, REST APIs

Development Tools: Git, GitHub, Docker, AWS, CI/CD, Unity, Jira, Postman
